

WELCOME TO YOUR CELESTIAL AKASHIC ACTIVATION !

© Chrissy Webster

Astrology can help activate your soul awakening.

Cosmic alignments are either:

1) Facilitating today's Mission, Lessons and Fulfilment

2) Your Galactic Lifetimes, Visiting Missions and Soul Groups (that support 1), as we can't download all of our thousands of lifetimes in an earth body!)

...only an Akashic Reading can reveal everything ...

Your guides control which alignments to relay frequencies to you, which can't be singled out by astrology, but many will apply to you.

We are multi-dimensional beings and we have numerous frequencies and lifetimes that we can tap into. Cosmic alignments can transmit fire, earth, air and water frequencies and characteristics that help form and flow for missions and lifetimes. Cosmic alignments are a combination lock with a complex ring of codes. This Quantum entanglement becomes your reality and timeline, plugged into lines of cause and effect. A link to remember lifetimes, skills, and soul groups.

What is this reading about?

This astrology chart is like the way people look at light codes. It's about the chart being absorbed subconsciously. I don't know anyone else that does charts this way. This activation will be happening at soul level, integrating your energy and physical aspects. Take it one day at a time, when you feel ready to explore this in the physical realm. Everything falls into place with alignment in the right vibration. Everything is orchestrated by your higher self. In the same way people gaze at their light codes, you can look and see what jumps out at you. For example, a client spotted a cosmic body that had their pet's name! There will be a subconscious shift occurring at the time that's right for your soul's awakening. Signs of awakening can include dreams, or body ascension symptoms like buzzing or ringing in ears.

Light code poetry to help activate you:

*The Stars align with such divineness
The Stars reveal what is in your deals
Sparkling and divine, light comes in lines
When the cosmos click it's a perfect fit*

About Soul Groups, Guides and Lifetimes

We have thousands of soul mates, in various teams, densities and realms. These are often beings that we've met in lifetimes. We take turns to help each other in whatever form we are in, from space vessels, to energy form, or other physical forms including animals, , even cameo appearances.

So Many Types of Beings in all Densities!

For example dragons occur in all densities such as primordial ethereal, elementals, angelic and physical. The same goes for any other type of being. This energy can be part of our DNA.

Angelic Dragons and Felines etc...

The Angelic realms are far more diverse than we realise and there are many life forms classed as angelic by their mission. There are many types of dragon and feline angels for example. There are also energy beings in the 'Mission Realms' tapped into the divine matrix of light and they can work on mapping the stars, for example. It is very possible that we have had any of these lifetimes in the past as we change missions, lessons and form each lifetime.

Lifetimes range from a higher vibrating energy form to other lower vibrational densities.

We do not all start in low density then 'evolve' to a higher vibrational density. We integrate our multidimensional selves. But I have seen very old souls where it is not apparent that they are spiritual or integrated ~ and this is free will! They might be working whilst sleeping though! My guides tell me there is only mission-lesson-fulfilment. And the reason? Any lifetime is a lesson and you'd be bored if it wasn't different!

Many types of beings exist in these huge star systems, not just one form, density or race (don't believe the hype!).

- Souls can be millions of years old and well travelled, and this may or may not show up in the chart, only what's needed in this lifetime.
